SUMMARY

MERN Stack Developer with hands-on experience designing, building, and deploying production-grade full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Skilled in REST API design and integration, JWT and Firebase authentication, role-based access control, MongoDB aggregation pipelines, and third-party payment integration with Stripe. Comfortable working across the full development lifecycle — from database schema design and backend architecture to responsive frontend interfaces and deployment on Vercel, Netlify, and Firebase Hosting. Completed an intensive 6-month full-stack bootcamp and has independently shipped multiple production-deployed projects with real-world features such as multi-role dashboards, online payments, and analytics.

TECHNICAL SKILLS

Languages & Core: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3

Frontend: React.js, Next.js, React Router, Tailwind CSS, DaisyUI, React Hooks (useState, useEffect, useContext), TanStack Query, React Hook Form

Backend & Database: Node.js, Express.js, MongoDB (incl. Aggregation Pipeline), RESTful API Design

Authentication & Integrations: Firebase Authentication, Firebase Admin SDK, JWT, Axios, Stripe Payment Integration, Cloudinary

Core Concepts: Private/Protected Routes, Pagination, Infinite Scrolling, Search Functionality, Role-Based Access Control, State Management

Deployment & Tools: Vercel, Netlify, Firebase Hosting, Surge, Git & GitHub, Postman

PROJECTS

ZapShift — Multi-Role Parcel Delivery Management System [Live Site](#) [GitHub](#)

- Built a full-stack parcel delivery platform with three role-based dashboards (Admin, Rider, User), each with permission-based UI and protected routes.
- Implemented secure authentication with Firebase (Email/Password + Google Sign-In) and JWT verification via Firebase Admin SDK on the backend.
- Developed real-time parcel tracking with unique tracking IDs and a status-log history (created → picked up → in-transit → delivered).
- Integrated Stripe for secure online parcel payments and used MongoDB aggregation pipelines to power an admin analytics dashboard (delivery status breakdown, rider performance).
- Resolved production issues including a Vercel cold-start race condition and a Stripe payment duplication bug fixed via atomic findOneAndUpdate + upsert.

Tech Stack: React.js, React Router, Tailwind CSS, Firebase Authentication, Node.js, Express.js, MongoDB, Axios, Stripe · **Deployment:** Client on Firebase Hosting, Server on Vercel

ScholarHub — Scholarship Management Platform [Live Site](#) [Frontend GitHub](#) [Server GitHub](#)

- Built a full-stack scholarship management application with three role-based dashboards (Admin, Moderator, Student) for managing applications, reviews, and approvals.
- Implemented Firebase Authentication with JWT-based role authorization to secure Express/MongoDB API routes by user role.
- Designed a dedicated application-tracking collection in MongoDB and integrated Stripe Checkout for scholarship application fee payments; migrated image hosting to Cloudinary for reliable uploads.
- Built a responsive dashboard UI with React, Tailwind CSS, and DaisyUI, including active-link navigation and nested dashboard routing.

Tech Stack: React.js, React Router, Tailwind CSS, DaisyUI, Firebase Authentication, Node.js, Express.js, MongoDB, JWT, Stripe, Cloudinary

Local Food Lovers Network — Community Food Review Platform [Live Site](#)

- Built a community food-review platform with full CRUD functionality, allowing users to create, edit, and delete their own posts.
- Implemented Firebase authentication with protected routes so only logged-in users can manage their reviews.

Tech Stack: React.js, React Router, Firebase Authentication, Node.js, Express.js, MongoDB, Axios · **Deployment:** Client on Firebase Hosting, Server on Vercel

Toy Universe — Local Kids Toy Store Platform [Live Site](#)

- Developed an e-commerce style toy store platform featuring Firebase authentication, product browsing, and protected checkout routes.

Tech Stack: React.js, React Router, Firebase Authentication, JavaScript (ES6), Tailwind CSS · **Deployment:** Firebase Hosting

TRAINING

Full-Stack Web Development Training — Programming Hero 06/2025 – 01/2026

MERN Stack Bootcamp | 6 Months

- Completed an intensive 6-month MERN Stack bootcamp, building full-stack applications with HTML, CSS, Tailwind CSS, JavaScript (ES6), React.js, Node.js, Express.js, MongoDB, and Firebase Authentication.
- Integrated REST APIs with Axios and implemented pagination, infinite scrolling, and search functionality across multiple projects.
- Built private/protected routes and multi-page navigation flows using React Router, including role-aware dashboard layouts.
- Deployed production applications to Vercel, Netlify, Firebase Hosting, and Surge, gaining hands-on experience with environment configuration and deployment troubleshooting.

EDUCATION

Bachelor of Technology in Mechanical Engineering 06/2022 – 06/2025

Institute of Science and Technology (MAKAUT, WB) · CGPA: 7.27

Diploma in Mechanical Engineering 06/2016 – 06/2019

Sree Ramkrishna Silpa Vidyapith (WBSCTE, WB) · Overall: 64.8%

Madhyamik (Secondary Examination) 2016

Brahmanbasan High School (WBBSE, WB) · Percentage: 68%
